

COURSE: 12

COURSE NAME: Diagnosis and Management of Injuries to the Teeth - (DaMn IT)

RESOURCE PERSONS: Dr M S Muthu & Team

LEARNING OBJECTIVES:

The first session of this interactive workshop, will focus on the definitions, terminologies and different classification systems and the limitations of Ellis and Devey's Classification.

The second session will elaborate various TDIs to the primary and permanent teeth and its clinical management with a wide range of clinical pictures and case presentations. Session three will provide a very interactive session on management of Avulsion of primary and permanent teeth with real time and simulated examples. Multiple cases with long term follow ups will be discussed.

Prior to the hands-on session, the participants will be involved in an interactive hypothetical situation titled - "Trauma Phone Call" - where the participant play the role of the dentist and the speaker acting like a parent/school teacher in the field with a child with TDI.
