PRE-CONGRESS HANDS-ON WORKSHOP WITH KIDSMILE PAEDIATRIC CROWNS

TITLE OF THE COURSE: “Innovations in Paediatric Veneers and Crowns:
Modern Restorations for the Primary Dentition”

Abstract

This interactive workshop bridges innovation and clinical practicality in paediatric restorative dentistry. Building on the concepts from the main lecture, participants will explore modern full coverage options for the primary dentition from Stainless Steel and Zirconia Crowns to next generation Laser Sintered Hybrid Glass. Through a combination of focused lecture, live demonstration and guided hands-on exercises, delegates will learn a simplified, minimally invasive workflow for achieving aesthetic, durable and child friendly restorations. Each participant will place Kidsmile Paediatric Crowns and Veneers on models under expert supervision, gaining practical insights into tooth preparation, surface treatment, cementation and finishing. This session is ideal for clinicians aiming to enhance their restorative confidence and integrate bioactive, aesthetic, and predictable materials into everyday paediatric practice.

LEARNING OUTCOMES:

1. Master a step-by-step workflow for placing Kidsmile Paediatric Crowns and Veneers on models.
2. Gain confidence in using bioactive, aesthetic materials for minimally invasive restorations in primary teeth.
3. Integrate modern preparation, bonding, and finishing techniques applicable in both digital and analog workflows.

COURSE FEE: Rs. 1000/-
