

COURSE-4

COURSE NAME: “Presurgical Nasoalveolar Molding (NAM) in Cleft lip and palate patients”

RESOURCE PERSON: Dr. Vinod Kumar

ABOUT THE COURSE: Presurgical nasoalveolar molding (NAM) has been a popular infant orthopedics therapy in recent years in the management of cleft lip and palate patient (CLCP). This modern noninvasive pre-surgical therapy will improve the anatomy of cleft nose, lip, and the alveolus, and reduces the gap in cleft lip and alveolus to a greater extent, which eases the surgery with highest esthetic outcomes with least scar tissue formation. This new treatment modality has brought newer hopes in lives of CLCP patients, and also enhancing the role of pediatric dentist to the main position in multidisciplinary team of cleft lip and palate. This skillful therapy if learned with proper protocol and methodology will yield better results.

COURSE FEE: Rs.1000/-

NO.OF STUDENTS: 20
